M700 GPT CHAMBER

I. **SCOPE:**

To inform our customers of a change that we made in the GPT chamber of the M700 calibrator

II. **PARTS:**

None

III. **TOOLS:**

None

IV. **PROCEDURE:**

The purpose of this note is to inform you of a change that API has made to the GPT mixing chamber of the calibrator. From August of 1998 API has changed the GPT chamber for the M700 calibrator. We have gone from two glass chambers to one. We made this change with the intent of increasing durability & reducing the complexity of this circuit in the calibrator. We have extensively tested this new chamber, & the new style chamber actually outperforms the older two-chamber style of mixing chamber.

If you have questions regarding this procedure or any API equipment, please contact an API Customer Service representative at:
