## **Population of Solid State Relays on the Relay Board**

**I. PURPOSE:**

This note provides information of relay board population.

**II. TOOLS:**

N/A

**III. PARTS:**

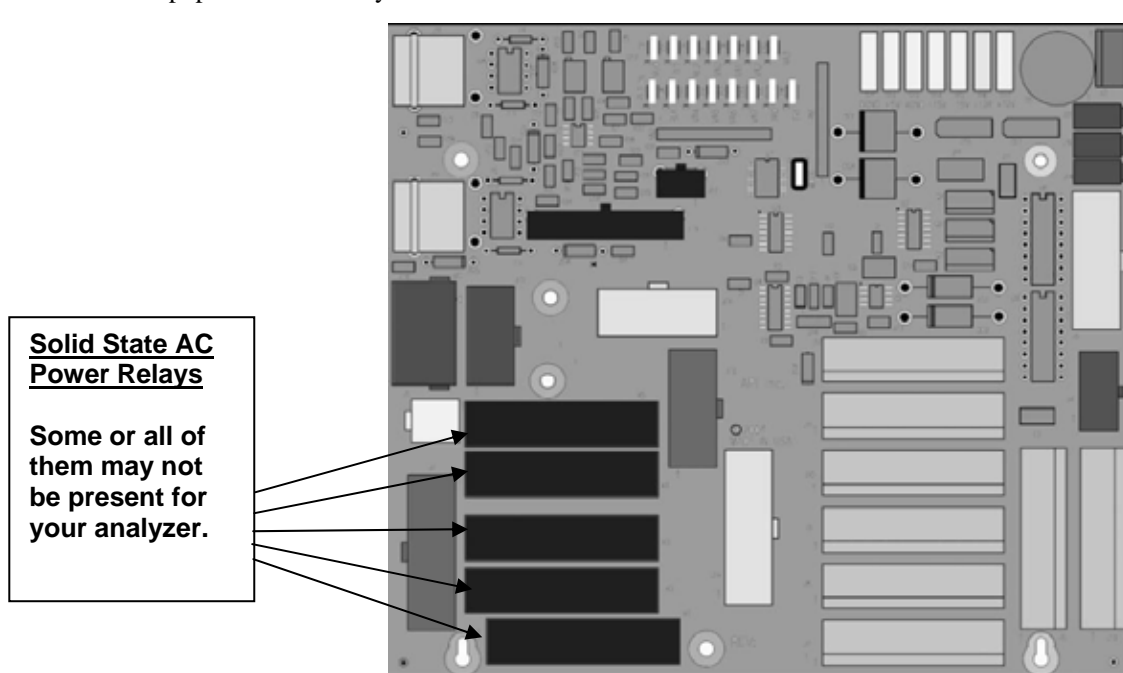

N/A

**IV. REFERENCES:**

N/A

**IV. PROCEDURE:**

The different models of analyzers have different needs for heaters and other high current components. These components are each controlled by a relay, and the relay board can have up to 5 relays. Teledyne-API policy has changed so we are not installing a relay unless that component is installed for your individual instruments configuration. So if the relay board does not have all of the slots populated with relays – don't be alarmed.
