**INFORMATION ON TELEDYNE-API HIGH LEVEL OZONE ANALYZER
O-RING REPLACEMENT INTERVAL**

I. PURPOSE:

To give information on the recent change in policy on the replacement of o-rings on the High level analyzers. Affected models:

M452
M454
M465H
M460H
M450H

II. TOOLS:

None.

III. PARTS:

None.

IV. PROCEDURE:

This service note is an information only type. This document informs you of a recent change to the recommended interval for replacement of the o-rings in the high level analyzers.

The o-rings should be replaced at least every 3 years. Please update your maintenance schedules and associated documents.

If the o-rings are not replaced, there may be potential that the o-rings will leak and allow sample gas to escape.

If you have any questions regarding this Service Note, please contact the Customer Service Department at api-customerservice@teledyne.com or at (858) 657-9800.
