5. Right click on the "Name" you given the instrument and Click Launch.

6. You can also download The DAS files by right clicking on the "Name" and click Download DAS. It will give you another screen. You can set download path, select start, end dates of the files you want and it will show you what DAS files are on the instrument click download and click close.

7. NumaView Firmware will allow multiple computers to be connected to the instrument at the same time while the operator is pressing buttons on the instrument. NumaView Remote will also allow Multiple windows to be opened so you can monitor more than one unit at the same time.

*****This NumaView Remote will only work with Ethernet*****
